

KY-019RM

5 V Relay

With the relay you can switch higher voltages by using a 5V output. This module can be soldered solidly or can be plugged on a breadboard.

Please note that the imprint on the relay only refers to the component itself and not to the entire board. Please adhere to the limit values in this data sheet!

MAIN FEATURES

| | |
|--------------------|----------------------------------------------------------|
| Model | 5 V Relay |
| Function | Relay for switching higher voltages by using a 5V output |
| Voltage range | 5 A / 50 V AC, 5 A / 30 V DC |
| Operating voltage | 5V |
| Dimensions | 26 x 38 x 18 mm |
| Scope of delievery | 5 V Relay |
