

# FLASH MEMORY MODULE

## SD-NAND

This flash memory allows you to store and read data externally via the SPI interface of your microcontroller.

The control of the module is exactly the same as with a conventional SD card and is therefore particularly simple.

The module is especially suitable for mobile setups, where normal SD cards could slip out of the SD card slot.

### MAIN FEATURES

Model	SD-NAND Flash
Special feature	3 V and 5 V operation due to the integrated voltage converter
Dimensions	18 x 22 x 12 mm
Weight	3 g
Items delivered	Memory module

### FURTHER SPECIFICATIONS

Supply voltage Vcc	3 - 5 V
Logic level	Vcc
Interface	SPI
Memory size	512 MB
Clock frequency	Up to 50 MHz

### FURTHER DETAILS

Article No.	COM-SD-NAND512
EAN	4250236822891
Customs Tariff No.	84717098
