

# ACRYLIC CASE

Transparent synthetic case for Raspberry Pi 4B

## 1. GENERAL INFORMATION

Dear customer,

Thank you for purchasing our product. In the following, we will show you which things should be noted during the use.

Should you encounter any unexpected problems, do not hesitate to contact us.

## 2. CONSTRUCTION

First, the protective film should be carefully peeled off from both sides.

First, glue the feet to the markings on the base plate so that the Raspberry Pi cannot slide within the case.  
The bottom plate has no ventilation holes compared to the lid.

Now place your Raspberry Pi on the base plate. Make sure that the SD card slot is above the notch of the base plate.

Now insert the side parts.

Now put the cover on the side parts of the case.

Now screw the case together using the screws and the spacers.

Your case is now completely assembled.

### 3. OTHER INFORMATION

Our Information and Take-back Obligations according to the Electrical and Electronic Equipment Act (ElektroG)

#### **Symbol on Electrical and Electronic Products:**

This crossed-out bin means that electrical and electronic products do not belong into the household waste. You must hand over your old appliance to a registration place. Before you can hand over the old appliance, you must remove used batteries and replacement batteries which are not enclosed by the device.

#### **Return Options:**

As the end user, you can hand over your old appliance (which has essentially the same functions as the new one bought with us) free of charge for disposal with the purchase of a new device.

Small devices, which do not have outer dimensions bigger than 25 cm can be handed in for disposal independently of the purchase of a new product in normal household quantities.
