

RB-LCD-7V2-CASE

CASE FOR THE ORIGINAL RASPBERRY PI TOUCH DISPLAY 2 WITH SPACE FOR YOUR RASPBERRY PI

JOY-IT

SPECIAL FEATURES

- ✔ Built-in fan
- ✔ Stand integrated directly into the housing
- ✔ Specially designed for the original Raspberry Pi Touch Display 2
- ✔ Made from high-quality black acrylic
- ✔ All connections accessible

The RB-LCD-7V2 case is the ideal complement to the original Raspberry Pi Touch Display 2 and offers an elegant, functional, and secure solution for housing your Raspberry Pi system. It combines modern design with thoughtful functionality to create a tidy, professional appearance—whether in the lab, classroom, on your desk, or in an industrial environment. The case not only makes your Raspberry Pi display a visual highlight, but also reliably protects it from dust, damage, and overheating.

Designed specifically for the Raspberry Pi Touch Display 2, the RB-LCD-7V2 case guarantees a perfect fit and a secure hold. The precisely manufactured cutouts ensure that all Raspberry Pi connections remain easily accessible, allowing you to conveniently connect power supplies, USB devices, memory, or sensors. Thanks to the well-thought-out layout, the system can be quickly assembled and is ready for use without the need for additional adapters.

The integrated stand ensures a secure footing and an optimal viewing angle, which makes operating the touch display much more comfortable. In addition, the built-in fan ensures constant air circulation and reliably protects the Raspberry Pi from overheating—even during intensive use or in closed environments. This makes the case not only a visual upgrade but also a functional upgrade for any Raspberry Pi project.

Made from high-quality black acrylic, the RB-LCD-7V2 case impresses with its robust construction and elegant, glossy surface. The material gives the case a pleasant feel and high stability. This turns your Raspberry Pi touch display into a professional, durable complete system that meets the highest technical and visual standards – ideal for presentations, control applications, or creative DIY projects.
