

RB-LCD10-2

10.1" IPS Touchscreen Display With Metal Body

The 10" touch display is a durable all-rounder. It is especially characterized by its solid quality. The matt-black metal body fits perfectly with the hard coating of the display (H3).

Due to the large number of connections and the built-in speakers, it is suitable as a second monitor for PC and notebook, workshop display, surveillance monitor for camera systems or mobile use in caravans.

It is also suitable for wall mounting due to the drill holes on the back.
